

Certificate

Pennsylvania British international College

IT IS HEREBY CERTIFY THAT

Mohamed Ali Ahmed Alazab

Upon recommendation of the Pennsylvania British international College
and in recognition of fulfillment of the prescribed requirements

Professional Master in Engineering Project Management

With all its right and Privileges in the witness whereof the seal of the Pennsylvania British international College hereunto affixed

Crt - Code : 2316800005310

Grade : Excellent

Srn : 095124425001121

Issued on : 2024

This certificate has been given at his request to be submitted to those who are interested in it

Pennsylvania British International College

Name : Mohamed Ali Ahmed Alazab

Nationality: Egyptian

Student ID: 2316800005310

Graduation Date: 2024

Program: Professional Master in Engineering Project Management

N	Subject	The Ratio Quality	Grade
1	Commercial law	3.50	B
2	The economics of money g Banking	4.05	A
3	Cost accounting	4.08	A+
4	Team building g human relations	3.50	B
5	International business Administration	4.07	A
6	State g national accounting	3.50	B
7	Legislation	4.05	A
8	Development of Economic Thinking	4.08	A+

uation Criteria for
the Master's Programs

Study Duration = 2022 To 2024

Professional Master in Engineering Project Management

OFFICIAL TRANSCRIPT

GPA = 85.3

Certificate

Graduation letter

To whom it May concern

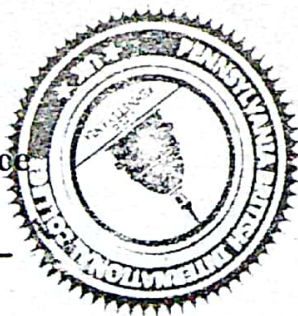

Based on the approval of Pennsylvania British international College
and the approval of the college president in
accordance with the powers delegated to him by
the Council in accordance with Resolution No. (425)

We acknowledge granting
the student **Mohamed Ali Ahmed Alazab**
Master in Engineering Project Management with a grade of distinction with honors,
with the approval of the research that
was submitted by the student in
"Innovation and Business Development
Strategies: A Case Study in a Specific Sector"

Crt - Code : 2316800005310

Srn 095124425001121

Dean Office

Name : Mohamed Ali Ahmed Alazab
ID NO. 29510131200371

Nationality: Egyptian
ID Student: 2316800005310

Degree Program: Master in Engineering Project Management

Congratulations, it is a pleasure for Penn International College to accept you
as a student in Professional Master in Engineering Project Management

We would like to welcome you to Pennsylvania British International College

We thank you for choosing us to help you build your future

Discussion of a Professional Master in Engineering Project Management

Engineering Project Management Placement Exam

All Penn College International Program students are required to take
a Project Management proficiency test and the number of courses you will be required to
take before or during regular academic study. Courses at Pennsylvania British International College
Please see the competency standards in the field of communication, behavior modification,
and communication. With regard to the field of Project Management

Guidance

Orientation

The Office of International Affairs will provide a new
student orientation (date TBD) to educate you about Penn International College.
International Student Issues and Immigration Matters, Fall 2022, 2024
Classes begin in 2022

Immigration Information

The International Affairs Office will provide you with all data and information
about the subjects to be studied, through your e-mail

The Research Presented

Thesis Title

Engineering Project Management According to the Standards of the Project Management Institute:
A Case Study of an Interior Design Project for Residential complex Abstract in English:
Engineering project management is a vital process that contributes to achieving desired objectives efficiently and effectively. According to the standards of the Project Management Institute (PMI), engineering project management encompasses key phases including initiation, planning, execution, monitoring, and closure. Each phase requires the use of specific tools and techniques to ensure the achievement of intended results. In this context, meticulous planning and scope definition are fundamental factors that contribute to project success, as they help guide efforts and allocate resources appropriately. In the case study of an interior design project for a building, PMI standards were applied to ensure the achievement of specified goals. The project began with scope definition, where a comprehensive analysis of needs and requirements was conducted. Subsequently, a detailed plan was developed, including a timeline, budget, and resource allocation. During the execution phase, monitoring techniques were employed to ensure progress aligned with the plan, and any challenges that arose were addressed promptly. This organized approach facilitated the realization of an interior design that aligned with the project's original vision and achieved customer satisfaction. In conclusion, this project demonstrates the importance of applying engineering project management standards in achieving effective results. By following the systematic steps outlined by PMI, we successfully executed an interior design project that enhances the value of the building and meets the desired objectives. The application of these standards is not limited to engineering projects but can be extended to other fields to enhance efficiency and achieve success.
