The Research Presented

Thesis Title

"The relationship and importance of therapeutic nutrition in the achievement and mental and physical development of secondary school students in schools

Summary Of The Study

Healthy food benefits the body and mind and one can contribute to the development of creativity, and if there is no fuel or good health provided to the body, the mind becomes slow.

Hence, the emerging vitamins emerging from the possibilities of innovation in the field of economics for the individual. He was interested in researching the importance of healthy food in building and building a strong nutrition system for behavior and a better learning environment

It contains various elements of fashion trends in school and they are fully prepared to learn.

Since healthy nutrition makes the student healthier and more active, it is certain that students will be absent partially and attend class partially.

He reviews studies that malnutrition leads to psychological disorders, and that sugar has a negative effect on the child. All the fine details of fine adjustments and simple functions
